### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Probst in view of Kelly (US Patent 4,255,777).

Probst discloses a liquid atomizing device comprising a conductive nozzle body 14 having a pressurized liquid supply 17, wherein the body is put on ground potential at portion 22, and a voltage supply to bring about an electrostatic charging of the liquid medium as recited. Probst does not disclose the voltage being pulsed. Kelly teaches a liquid atomizing device which uses a pulsed voltage source to electrostatically charge the liquid. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Probst by providing a pulsed voltage source to electrostatically charge the liquid as has been taught by Kelly. The device will carry out methods as recited. Regarding claim 3, this method step would have been obvious to one having ordinary skill in the art in order to compensate for a reduction of the pressure of the liquid medium in order to adequately atomize the liquid. Regarding claim 4, the liquid comprising liquid fuel would have been a matter of design choice, and it would have been obvious to one having ordinary skill in the art that a

higher duty cycle would be applied during start up since the fuel is cold in order to adequately atomize the fuel.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Kelly '394 and Kelly '465 are pertinent to Applicant's invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
